# Volere Requirements Specification Template

## **Project Needs**

1. *The Purpose of the Project* — business problem and its intended solution by the product
2. *Stakeholders* — client, customer, users
3. *Relevant Facts and Assumptions*
4. *The Scope of the Work* — context diagram and business use-cases
5. *Business Data Model*
6. *The Scope of the Product* — product boundary and use-cases

# Volere Requirements Specification Template

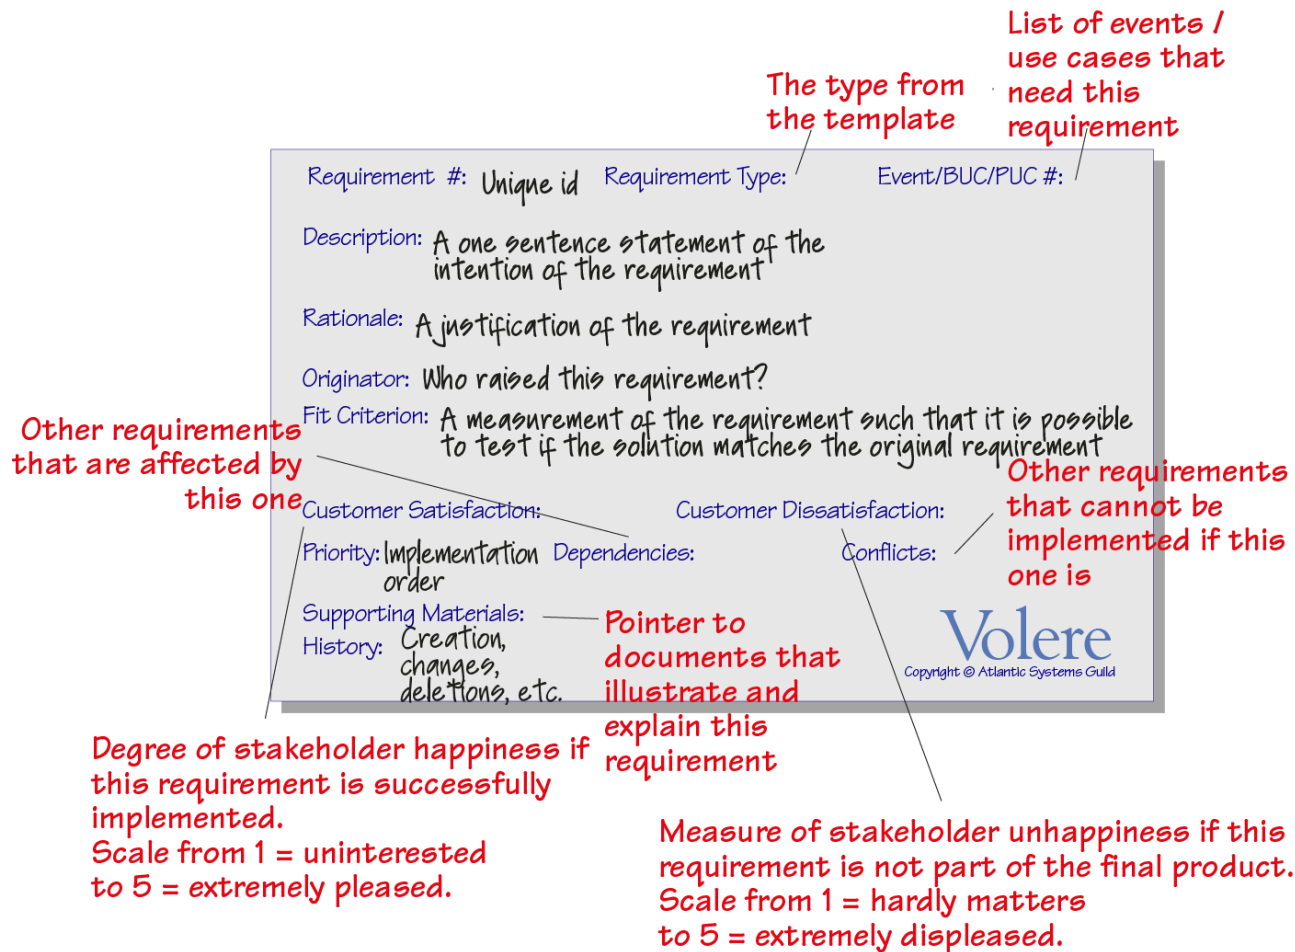

## **Project Requirements**

1. *Constraints* — constraints on the eventual design of the product
2. *Functional Requirements* — specification for each atomic functional requirement
3. *Non-functional Requirements* — look & feel, usability, performance, operational, maintainability, security, cultural and compliance requirements

# Volere Requirements Specification Template

## Requirements Shell

# Volere Requirements Specification Template

## **Project Issues**

1. *Open Issues*
2. *Off-the-Shelf Solutions*
3. *New Problems*
4. *Tasks*
5. *Migration to the New Product*
6. *Risks*
7. *Costs*
8. *User Documentation and Training*
9. *Waiting Room*
10. *Ideas for Solutions*

# Volere Requirements Specification Template

## **Naming Conventions and Definitions**

1. *Glossary* — meanings of all names, acronyms, and abbreviations used by the stakeholders
2. *Data Dictionary* — the data inputs and outputs specified as you define detailed atomic requirements

# Volere Requirements Specification Template

## ReqView Implementation

| NEEDS-27 | 6.3 Product Use Cases       |

**Structured Requirements Specification**

**Template Instructions**

The scope of the work determines the boundaries of the business area to be studied and outlines how it fits into its environment. Once you understand the work and its constraints, you can establish the scope of the product see section *The Scope of the Product*.
